

# PROFILE

## WHO WE ARE

Led by a passionate programmer, enigma IT was founded on 2010 to basically provide cutting edge solutions to everyday problems.

Run by a team of thoughtful, young and vibrant Software, Systems, and Networking Engineers across the globe, the company is able to provide seemingly simple solutions to otherwise complex problems using cutting-edge technology in ways that are sometimes mind-bugling.

The passion and professionalism behind the company and the love for what we do has led us to be endeared by a number of clients to whom we have become a reliable solutions provider and support system.
